Atmospheric Diseases. The air, without which no creature conla patched up and made "as good as new" out of the State Treasury! We learn from a report made to the late Legislature that the following expenditures have been made from money furnished from the State in spring holds in solution its portion of miasmatic poison.

The evil effects of this perial virus can only be certainly averted by increasing the vital activity of the system and securing ener, regulator and antidote to malaria, is imperatively required in the spring months. umes its most distressing types and that presses the spiritains well as the physical nergies, and in order to restore their clas-

All the world knows that the wonderful efficacy of Hostetter's Bitters in cases of and malarious fever is due to the potency of its tonic, alterative and aperient malerials and the absolutely pure stimulant with which they are incorporated.

It is because the public have been taught by twenty years' experience that the article performs uniformly and certainly all that It is advertised to do-that they prefer this sovereign tonic to every other. Hence its immense and ever increasing sales, and hence, too, alas? the many counterfeits and imitations, against which there is no safe-

ionns. The cigarette is supplanting the hockah in the affections of young Turkey.
